PGS-1025	619		<p>The PGS shall provide a Science Processing Library containing <u>access to</u> routines such as:</p> <ul style="list-style-type: none"><li>a. Image processing routines</li><li>b. Data visualization routines</li><li>c. Graphics routines</li></ul>
IMS-0270	873		<p>IMS shall <del>maintain information on the science processing library holdings and provide the capability for users to search for and order science processing library software</del> <u>provide access to ECS software available for re-use as well as pointers to externally provided software.</u></p>
IMS-0500	896		<p>The IMS shall provide access to information to include at a minimum:</p> <ul style="list-style-type: none"><li>a. Metadata</li><li>b. Spacecraft housekeeping and ancillary data information</li><li>c. Engineering data</li><li>d. EOC historical data</li><li>e. Data acquisition plans and schedules</li><li>f. Processing schedules</li><li>g. Documentation</li><li>h. ESDIS Project Policies and Procedures obtained from SMC data base</li><li>i. <del>Science Processing Library software</del> <u>ECS supported software</u></li><li>j. <del>Documentation on data format and metadata standards</del></li><li><u>Externally provided (unsupported, non-ECS) software</u></li><li>k. <u>Documentation on data format and metadata standards</u></li></ul>
IMS-1790	1464		<p>The IMS shall provide, based upon the data model defined in Appendix C, sufficient storage for, at a minimum:</p> <ul style="list-style-type: none"><li>a. Directory metadata</li><li>b. Guide (documentation/reference material) metadata</li><li>c. Inventory metadata</li></ul>
